

FEMA Infrared Thermometers Available to Critical Infrastructure Workers Through IOWARN Network

A limited supply of Infrared thermometers has been made available to utilities that are implementing procedures requiring employees to undergo a temperature scan at the beginning of each work day or desire to have one on hand to confirm an employee's temperature during the day if they begin to feel ill.

IHSEM provided the thermometers to Iowa Rural Water and IAMU to distribute to Critical Infrastructure throughout the state.

Since mask distribution points were already in use, Iowa Rural Water delivered thermometers to these locations in each region.

Infrared thermometers will be available for pickup at specific water/wastewater utilities **listed below** in each of the six IDNR Regions. Contact the Distribution Point closest to you to arrange pickup.

Procedures for picking up a thermometer are the same as for the masks at each location.

Water/Wastewater Utility's in each region have provided the location and instructions on how to request and pick up a thermometer in a minimal contact manner below. **NOTE: If you desire additional masks you may pick up an additional 10 masks (two packs) per employee as well.** We encourage you to contact your neighboring communities and pick up a thermometer and masks for them as well. You **MUST** inform the pickup location which systems you are picking up for if they are Water or Wastewater and how many employees at each.

Site # 1: Region 1 - Waterloo

Pickup Location: 325 Sycamore St. Waterloo IA

Pickup Instructions: Email request to: ryan.manahl@waterloo-ia.org **Provide:** Utility name, Water or Wastewater, PWS or NPDES #, and number of employees. Thermometer or Masks can be picked up the following day from 8am – 9:30 am or 10am – 12:00pm at the west overhead door across from the Post Office. The facility is locked. Upon arrival remain in your vehicle and call Ryan at 319-415-5340, the masks will be brought out to your vehicle.

JOIN IOWARN TODAY

These times highlight the importance of being part of a WARN network. IOWARN is a Water/Wastewater Agency Response (WARN) network, a group of utilities committed to helping each other conduct response and recovery operations. A WARN provides a system of aid that may be utilized by water/wastewater utilities requiring emergency assistance from member utilities.

There is no cost or obligation to be a member, go to <http://iowarn.org/> print and sign the agreement and return a scanned copy to IOWARN Chair, John Lins lins@dmww.com 515-208-1993.
